CAREER OBJECTIVE

To obtain a challenging .NET Full Stack Developer role in a dynamic organization where I can apply my expertise in C#, ASP.NET Core, Web API, Angular, and SQL Server to design and deliver scalable, secure, and high-performance web applications, while contributing to innovative solutions and continuously enhancing my technical skills in a collaborative Agile environment.

PROFESSIONAL SUMMARY

- 5+ years of experience in designing, developing, and maintaining scalable web applications using C#, .NET Core, ASP.NET, ASP.NET MVC, and RESTful APIs. Strong experience in full-stack development using Angular, HTML, CSS, and JavaScript to build responsive and user-friendly applications.
- Proficient in C# and OOPS concepts including Generics, Collections, Multithreading, and asynchronous programming for developing efficient and high-performance applications.
- Hands-on experience with Entity Framework, ADO.NET, SQL databases (SQL Server/PostgreSQL) including database design, query optimization, and performance tuning.
- Experience in microservices architecture, implementing API Gateway, Kafka messaging, and event-driven systems, with authentication mechanisms like OAuth. Familiar with DevOps and cloud practices including Git, Jenkins, JFrog, CI/CD pipelines, Docker, and Microsoft Azure. Experienced in Agile/Scrum environments, collaborating with cross-functional teams, conducting code reviews, and delivering high-quality software solutions.

EDUCATION

Bachelor in Computer Application (BCA) – Computer Science & Engineering, Integral University Lucknow, Uttar Pradesh, CGPA: 8.78 (May 2015 – May 2018)

TECHNICAL SKILLS

Programming Languages, Backend Technologies & Security: C#, .NET, ASP.NET Core, JavaScript, TypeScript, SQL, ASP.NET Core MVC, ASP.NET Web API, RESTful Services, Entity Framework Core, LINQ, Dependency Injection, ADO.NET and OAuth (authentication & authorization).

Frontend Technologies, Architecture, Concepts & Messaging / Streaming: OOP, MVC Architecture, SOLID Principles, Data Structures & Algorithms (DSA), Generics & Collections, Multithreading and Asynchronous Programming, Microservices Architecture, API Gateway, Event-Driven Architecture & Kafka, Angular, HTML5, CSS3, Bootstrap, Responsive Web Design

Database, ORM, Tools & DevOps: SQL Server, MySQL, Database Design, Stored Procedures, Entity Framework, Visual Studio, VS Code, Git, GitHub, Postman, Swagger, Docker (basic), Jenkins, JFrog

Cloud & Deployment, Testing & Practices: Microsoft Azure (Basics), IIS, CI/CD Pipelines (Basics), Unit Testing, Debugging, Code Review, Agile/Scrum, SDLC

PROFESSIONAL EXPERIENCES & PROJECTS

Senior Software Engineer | Mphasis

Nov 2024-Feb 2026

Project: Online Banking Platform

Tech Stack: ASP.NET Core, C#, Microservices, Entity Framework Core, REST APIs, OAuth2, JWT, SQL Server, Azure DevOps, CI/CD

Roles & Responsibilities:

Developed banking microservices using ASP.NET Core and REST. Implemented JWT/OAuth security and payment integrations. Optimized SQL performance using Entity Framework. Supported CI/CD, code reviews and production support in Agile.

Programmer Analyst | Cognizant

June 2022-July 2023

Project: HRMS & Payroll System

Tech Stack: ASP.NET Core, C#, REST APIs, Microservices, SQL Server

Roles & Responsibilities:

Developed HRMS & Payroll microservices using ASP.NET Core and REST Apis. Implemented business logic and SQL Server database operations. Worked on payroll processing, salary and tax modules. Supported production deployments, defect fixes and SOX documentation. Participated in Agile development activities.

Software Developer | Cyient Limited

Dec 2021- Jun 2022

Project: Airline Ticketing and Reservation System

Tech Stack: ASP.NET Core, Angular, REST APIs, Microservices, SQL Server

Roles & Responsibilities:

Developed flight booking, cancellation and passenger management services using ASP.NET Core. Built Angular frontend and designed REST APIs for reservation workflows. Implemented validations, business logic and CRUD operations. Followed layered architecture and clean coding practices.

.NET Developer | Analyze Infotech

Jun 2019- Dec 2021

Project: Retails eCommerce and Operation Portal

Tech Stack: ASP.NET Web Forms, ASP.NET MVC, C#, SQL Server, ServiceNow

Roles & Responsibilities:

Developed retail commerce modules including product catalog, order processing and customer management. Worked on ASP.NET Web Forms legacy modules and enhanced MVC components. Maintained SQL Server database and improved query performance.
